

GL-4 Mid-Duty Automotive Gear Oil

Applications

KunLun GL-4 gear oil is a milder extreme-pressure gear oil meeting API GL-4.(under moderate conditions) of passenger cars and other vehicles.

Features

- Good loading capability, preventing from gear scoring and abrasion to prolong service life of equipment.
- Excellent anti-rust and anti-corrosion properties, effectively prevent rust and corrosion under humid and water-containing environment.
- Excellent thermal oxidation stability, reducing the formation of oxidant under the condition of high temperature and heavy duty, maintaining the cleanliness of gear surface.
